

Free Student Field Trip Aquaculture 2010

Hubbs - SeaWorld Marine Fish Hatchery
Carlsbad, California

In October of 1995, the Leon Raymond Hubbard, Jr., Marine Fish Hatchery was dedicated as one of southern California's premier aquaculture facilities. Built on land donated by San Diego Gas & Electric on Agua Hedonia Lagoon in Carlsbad, California, this 22,000-square-foot hatchery is an expansion of the successful Ocean Resources Enhancement and Hatchery Program which is restoring the California white seabass population through innovative aquaculture and fishery enhancement techniques developed at Hubbs-SeaWorld Research Institute. The hatchery is capable of producing over 350,000 juvenile white seabass annually.

Itinerary – Monday, March 1, 2010

- 12:20 pm Attendees meet at the Town and Country Convention Center
- 12:30 pm Buses promptly depart convention center
- 1:00-1:15 pm Arrive at Hubbs-SeaWorld Leon Raymond Hubbard, Jr., Marine Fish Hatchery in Carlsbad, CA
- 1:30-2:30 pm Tour Marine Fish Hatchery
- 2:30 pm Board Buses
- 3:00-3:30 pm Arrive back at the Town and Country Convention Center

Attire – please wear closed-toed, flat-soled shoes or boots because the hatchery is a wet environment and you will be asked to walk through sanitizing footbaths as you tour through the facility.

The trip is free of charge for all students registered to attend Aquaculture 2010. To sign up please contact the field trip coordinator, Matthew DiMaggio (mdimaggi@ufl.edu), with your email address and a contact phone number. Sign up today, space is limited.
